After the successful use of circular structural hollow sections acc. to EN 10210 and EN 10219 in material grade S 355 J2H for various large-scale projects in Germany and further European countries, we now decided to stock these products at our Tube Distribution Centre in Mülheim/Ruhr.

In addition to our established construction-steel products, squares and rectangles, we are also prepared for prompt delivery of circular structural hollow sections in following sizes:

from **139.7 x 5 mm**
to **508.0 x 16 mm**

Your inquiries are welcome.
